## DETAILED ACTION

### *Supplemental Election/Restrictions*

1. The following Office action imposes a further restriction to the group of claims previously elected by applicant on 04-26-04. The late identification of this further restriction requirement is regretted.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-35, drawn to an array of thermally isolated sample wells, classified in class 422, subclass 102.
- II. Claims 36-40, drawn to an array of fluidically isolated sample wells, classified in class 422, subclass 102.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions and different effects. Specifically, the structure of invention I is characterized solely by providing sample wells which are thermally isolated from each other. The second microplate of invention II, however, is characterized solely by providing sample wells which are fluidically isolated. The effects and modes of operation in achieving those effects are thus patentably distinct.

4. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper. Specifically, the specifically recited thermal characteristics for invention II mandate a search in thermal device classifications, including class 248, subclass 901, and class 165, which are not required for invention I.
5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey R. Snay whose telephone number is (571) 272-1264. The examiner can normally be reached on Mon-Fri.
